Statutory and Healthcare Professional Body Registers

1. Introduction

Some of the registrants on the COSCA Register of Counsellors and Psychotherapists may also be listed on statutory and healthcare professional body registers. This can be because they also practice in other professions e.g. nurses, teachers, social workers etc.

In the interests of public protection, all COSCA registrants on statutory and health care registers are identified as such under their names on the COSCA Register of Counsellors and Psychotherapists.

In order to protect the public, when COSCA registrants, who are also registered with a statutory and/or healthcare professional body is removed from the COSCA Register on fitness to practise grounds, COSCA will notify the holder of the statutory professional register or other professional body of the removal of the registrant.

Below is a list of the statutory and healthcare professional body organisations that hold registers.

Members of the public and service users can use the information below to make informed decisions about the choice of a COSCA registrant as a counsellor or psychotherapist.

The information provided below is also provided to help open up routes of complaints against COSCA registrant to all relevant bodies.
