The Role of Research Awareness in the COSCA Certificate in Counselling Skills - Video

COSCA (Counselling & Psychotherapy in Scotland) has produced a video for participants on the COSCA Counselling Skills Course. Presented by John McLeod, Professor of Counselling at the University of Abertay, the video shows the relevance of research awareness to participants.

The video also looks at the research that has been carried out, how to make sense of research papers and where to find them. It encourages participants on the course to build their own personal evidence base and suggests further reading.

To view the video (30 minutes in length) click on the link below.
