

### **Building a network of Tourette Syndrome specialists for Scotland**

Tourette Scotland would like to hear from any therapists or clinicians who have experience of delivering therapy for tics (HRT, ERP, CBITS etc.). We hope to hear from healthcare professionals who have some knowledge about tics and tic disorders like Tourette Syndrome so that they can be approached and invited to join a network of consultants, therapists and clinicians in Scotland who have experience of diagnosing and treating tics and tic disorders such as Tourette Syndrome.

Tourette Scotland and its supporters will benefit from having links with this network and in turn help support clinicians and therapists in their work by offering leaflets, training and events of interest to them.

You can read more about this online and complete an application form to join the list <https://www.tourettescotland.org/professional-network>

If you have any questions please contact [info@tourettescotland.org](mailto:info@tourettescotland.org)
