Significantly, all our training is delivered by experienced counsellors who can provide useful insights into the field.

Who is it for?

What will participants learn?

- **Skills:** Through engaging in experiential learning, you will learn communication skills and how to actively listen to others.
- **Self-awareness:** Participants become more aware of their own responses and what drives these, helping to separate their interests from those of the person they are supporting.
- **Knowledge & Ethics:** The course introduces theoretical perspectives that underpin different counselling approaches, and the ethics required in any supportive relationship.
